

Compensation

Service-Connected Disability or Death Benefits

The Compensation program provides tax-free monthly benefits to Veterans in recognition of the effects of disabilities caused by diseases, events, or injuries incurred or aggravated during active military service. The program also provides monthly payments to surviving spouses, dependent children, and dependent parents in recognition of the economic loss caused by the death of individuals during their military service or as a result of service-connected disability after their discharge.

To be eligible for disability compensation, the Veteran must have served under conditions other than dishonorable, and the disability must not be the result of the Veteran's own misconduct. VA pays disability compensation monthly, and the amount varies according to the degree of disability and the number of dependents. The degree of disability varies from 0 percent to 100 percent, in increments of 10 percent. VA calculates the total service-connected disability by combining evaluations for individual disabilities rather than adding them. VA pays additional special monthly compensation when severe disabilities confine Veterans to their immediate premises, require the aid and assistance of others, or include anatomical loss or loss of use of extremities or creative organs.

The PACT Act was signed into law on August 10, 2022. It is a new law that expands VA health care and benefits for Veterans exposed to burn pits, Agent Orange, and other toxic substances. This law helps us provide generations of Veterans—and their survivors—with the care and benefits they've earned and deserve. The annual benefit report includes PACT claims. Consolidated PACT specific reporting data is available at: <https://www.accesstocare.va.gov/PactAct>.

A note on the data:

The 2023 Annual Benefits Report is based on data from the VBA corporate database.

The availability of gender and age data is limited, as some records are listed as "unknown." Those records are accounted for in the totals for each table, but not in the category columns. Please see footnotes for additional information.

All Veterans counted in this section are receiving compensation benefit payments as of Sept. 30, 2023. The category of 0 percent indicates payment due to special monthly compensation or two or more permanent 0-percent service-connected disabilities which clearly interfere with normal employability. Veterans with a 0 percent combined degree of disability not receiving payment are not counted in this section.

Please see the section: "The Presentation of FY 2023 Compensation Data" on page [71](#) for important information on the color coding of the data tables.

Dependency and Indemnity Compensation data are found beginning on page [116](#).

The Presentation of FY 2023 Compensation Data

New to the rolls

Individuals who began receiving benefits during fiscal year 2023 (October 1, 2022 to September 30, 2023) are considered “New to the rolls,” and the tables are outlined in blue.

On the rolls

All individuals receiving benefits on September 30, 2023 are considered “On the rolls” and the tables are outlined in green.

These tables include “New to the rolls” recipients.

Please note the difference between counts of Veterans and counts of disabilities. A Veteran may be receiving benefits based on one or more disabilities, which is why numbers of disabilities are much higher than numbers of Veterans. Counts of disabilities are indicated by the section title and table header and begin on page [93](#).

Data regarding payments do not reflect actual amounts paid by VA. This document only addresses monthly benefit payments and does not include retroactive payments. Also, estimated average annual individual payments for the same combined degree differ slightly due to additional payments for dependents and/or special monthly compensation. Also, all payment information is annual unless stated otherwise. Please refer to the official budget internet site here <https://department.va.gov/administrations-and-offices/management/budget/> for actual amounts paid by VA.

This document counts all Veterans with 0-percent combined disability as long as they receive payment for special monthly compensation or a 10-percent rate because they have two or more separate permanent 0-percent service-connected disabilities which clearly interfere with normal employability. This document does not count Veterans with 0-percent combined disabilities who are not receiving payment of any kind.

VA has incorporated Global War on Terror (GWOT) data to the main data tables as a subset of the Gulf War era (GW) period of service. Since September 11, 2001, the Department of Defense has deployed personnel overseas in support of GWOT, including Operation Iraqi Freedom/Operation Enduring Freedom/Operation New Dawn (OIF/OEF/OND). For more information, see pages [75](#), [88](#) through [92](#), and [110](#) through [115](#).

VBA’s computer systems do not contain data that would allow us to attribute Veterans’ disabilities to specific periods of service or deployment. Therefore, GWOT is a subset that includes Veterans who filed disability compensation claims at some point either prior to or following their GWOT deployment. VBA is not able to identify which of these Veterans filed a claim for disabilities incurred during their actual overseas GWOT deployment.

The Office of Performance Analysis and Integrity is available to answer questions regarding the data contained in this report by email at PAI.VBACO@va.gov.

Regarding Service-Connected Disability Data

The tables on the following pages present information on the number of service-connected disabilities, as opposed to the number of Veterans with those disability evaluations.

Tables labeled “Number of SC disabilities of new compensation recipients” display counts of service-connected disabilities which VBA rated for new recipients during FY 2023. Tables labeled “Number of SC disabilities of all compensation recipients” display counts of all rated service-connected disabilities for all Veterans receiving compensation at the end of FY 2023.

VBA has abbreviated the names of the body systems to allow for a clearer presentation of the information. The three body systems with the greatest changes in terminology are:

- “Organs of special sense” abbreviated to: “The Eye”
- “Infectious Diseases, Immune Disorders, and Nutritional Deficiencies” abbreviated to: “Infection/Immune/Nutrition”
- “Neurological Conditions and Convulsive Disorders” abbreviated to: “Neurological”

Any use of the term “disabilities” in the following section includes service-connected disabilities only.

Number of SC Disabilities and Prevalence by Body System

The detail table number corresponds to the tables on the following pages that show the number of SC disabilities in each body system broken down by evaluation. The percentage on the detail tables is the evaluation prevalence out of all disabilities in that particular body system.

Most Prevalent SC Disabilities – by Disability Type

The disabilities listed on pages [103](#) through [105](#) are grouped by one of over 900 individual disability codes. Disability types in the table below with a ⁴² footnote are groups of these codes based on the general disability type or condition. VBA created these groups to show more clearly the most prevalent types of disabilities which affect Veterans.

For example: on page [103](#) under Musculoskeletal Disabilities, only the top 30.5% are listed and two of them are related to limited motion. The table below lists the top 79.0% of Musculoskeletal disabilities, grouping all limitation-of-motion disabilities regardless of body part affected.

GWOT Most Prevalent SC Disabilities by Gender

VA's computer systems do not contain data that would allow us to attribute Veterans' disabilities to a specific period of service or deployment. Therefore, GWOT is a subset defined by Veterans who filed a disability compensation claim at some point either prior to or following their GWOT deployment. VA cannot identify which of these Veterans filed claims for disabilities incurred during their actual overseas GWOT deployment.

Dependency and Indemnity Compensation (DIC)

DIC is a tax-free monetary benefit generally payable to a surviving spouse, child, or parent of Servicemembers who died while on active duty, active duty for training, or inactive duty training; or to survivors of Veterans who died from their service-connected disabilities; or to certain survivors of Veterans who were totally disabled due to service-connected causes at the time of their death. Parents' DIC is an income-based benefit for parents who were financially dependent on a Servicemember or Veteran who died from a service-related cause.
